Marathon Community Compost Program Application

The Marathon Community Compost Program is an innovative waste diversion opportunity created through a partnership between the Town of Marathon and the Community Garden Collective. **The program will place a NatureMill Electric Composter in your home at no cost to you!** This composter works for just pennies a day and will convert all your household organics into rich compost. The goal of the project is to divert as much waste from our landfill as possible. As such, all successful applicants will be expected to track the compost they create (using simple instructions with the machine) and provide that information to the Town/Community Garden. Great for gardens and great for the environment, the Marathon Community Compost Program is an ideal way to live green and reduce the pressure on our landfill.

Application:

1. Name: _____
2. Address: _____
3. I own the home listed above: †Yes †No
4. I have lived in Marathon as a ratepayer for _____ years.
5. I have composted in the past: †Yes †No
