

“Marathon Now Allows Residents to Dispose of Yard Waste Free of Charge”

The Town of Marathon wishes to advise residents that yard waste can now be disposed free of charge at the recycling center of the Waste Transfer Station (WTS).

Residents may bring leaves, grass clippings and small branches to the transfer station in kraft paper, or clear plastic bags. This service is in keeping with Town Council’s policy of waste diversion whenever possible and will be a further alternative to illegal dumping on surrounding green spaces and crown lands. Marathon’s Council and Administration are always looking for ways to divert waste and this additional material stream is a welcome addition to an already robust recycling program which includes.

- Cardboard
- Fibre
- Plastics
- Steel
- Electronics
- And coming soon, Household Hazardous Waste

This addition to the program will run during extended recycling hours which are currently in effect until late October. Free yard waste disposal will be available at the transfer station only, there will be no curbside pickup of this material.
