Plan your escape today.... Your life may depend on it tomorrow.

Plan Your Escape Today... Your Life May Depend On It Tomorrow.

Anyone who has lived through a fire will tell you how terrifying it is. Sadly, sometimes people don't live to talk about it. We know, because we see the tragic results of fire every day.

Often the victims of fire need not have perished. They did because they did not react quickly enough or because they were not alerted in time to escape. Smoke alarms alert you and are required by law on every storey of your home. Although schools conduct regular fire drills, most fatal fires happen at home. It is critical to develop an effective home fire safety plan and practice it regularly. This will ensure that if a fire happens, everyone will know exactly what to do.

In more cases than we'd like to remember, help or escape was on the other side of a door, or at the opposite end of a corridor. Lives were lost because people either didn't know or couldn't find their way out of a burning building. Don't let this happen to you or your loved ones. Use the grid sheet inside this booklet and the accompanying fire safety checklist to eliminate fire hazards and plan your escape route.

Home Fire Safety advice from the Barrie Fire Service.

Check Your Way to Fire Safety. Don't Give a Fire a Place to Start.

How safe are you from fire? Ask yourself these questions. Be honest. If you answer no to any of these questions, you have potentially life threatening fire hazards in your home.

Protect Your Home and Family from Fire.

dangers of fire:

- Smoke alarms provide a precious early warning that can make the difference between living and dying in a fire. Install a smoke alarm on every storey of your home, including the basement and outside all sleeping areas.
- Heat, smoke and deadly gases rise. In the event of fire, cover your nose and mouth with a cloth and crawl to the nearest exit.
- If you plan to escape via a window, be sure to shut the door to the room before opening the window, otherwise the resulting draft could fan the fire and cut off your escape.
- Closed doors help slow the spread of fire, smoke and gasses but make sure you have an alarm inside the bedroom if you sleep with the door closed.
- In the event of fire, shout warnings and get everyone out of your home immediately. Once outside, stay out. Never go back into a burning building.
- If your clothes catch on fire, stop, drop to the ground, and roll to smother the flames.

If you need help in preparing your fire escape plan, or if you have any questions concerning fire safety, visit your nearest fire station, or phone The Town of Marathon Services Manager at Emergency 229-1232.

To test how safe your home is from fire, refer to the Checklist to Fire Safety on the back.

Practice And Talk About Your Fire Escape Plan.

Anyone who has lived through a fire will tell you how terrifying it is. Sadly, sometimes people don't live to talk about it. We know, because we see the tragic results of fire every day.

Often the victims of fire need not have perished. They did because they did not react quickly enough or because they were not alerted in time to escape. Smoke alarms alert you and are required by law on every storey of your home.

Although schools conduct regular fire drills, most fatal fires happen at home. It is critical to develop an effective home fire safety plan and practice it regularly. This will ensure that if a fire happens, everyone will know exactly what to do.

In more cases than we'd like to remember help or escape was on the other side of a door, or at the opposite end of a corridor. Lives were lost because people either didn't

Each member of the household should become familiar with the methods of escape, and take part in regular fire drills. Fire safety and escape planning is a family affair.

Pre-arrange a meeting place a safe distance away from the building so you can make sure everyone is accounted for.

Plan to Live.

Make sure family members, overnight guests and babysitters are familiar with your home escape plan. You may wish to post the escape plan where it will be seen by everyone (ie. on the fridge).

Have an alternate plan. The main escape route may become impassable because of smoke or fire.

Decide in advance who will assist the very young, the elderly or the infirm in the event of an emergency.

Conduct regular fire drills. Have family members practise escaping 'blind' from every area of the house.

of hearing.

Be sure everyone in the household knows how to dial 911 and report a fire as soon as they are safely out of the house or apartment.

know or couldn't find their way out of a burning building. Don't let this happen to you or your loved ones. Use this grid sheet and the accompanying fire safety checklist to eliminate fire hazards and plan your escape route.

Home Fire Safety Advice from The Town of Marathon Emergency Services.

Install extra alarms if necessary – in bedrooms where doors are kept closed or for persons who are hard GET OUT AND STAY OUT! Never let anyone go back into a burning building!

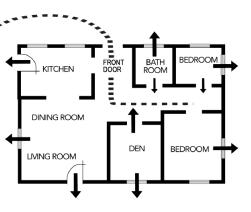

Use this grid to draw a map of your home, similar to the example shown. Prepare a diagram for each floor. Include all emergency exits (at least two exits from each room, if possible). Show all walls, doors, windows and stairs. Clearly mark your agreed-upon meeting place away from the home.
